

Full House Water Purification Systems from Watermark

Features include:

Control Valve

- Metered "On Demand"
- LED status/programming indicators
- Fully programmable regeneration cycle
- Brine tank overflow safety

Bacteria Guard

- Creates an environment unsuitable for the survival of bacteria and micro-organisms
- Virtually removes all chlorine
- Protects and extends life of resin and granular activated carbon
- Reduces lead and other heavy metals

Granular Activated Carbon

- Reduces volatile organic chemicals such as pesticides, herbicides, industrial chemicals, household cleaners, and a host of additional chemicals that may find their way into your water supply. Also reduces chlorine and chloramines.

High Capacity Fine Mesh Resin

- Removes troublesome dissolved solids and eliminates all the problems associated with hard water.
- Softens up to 36,000 grains of hardness per cubic foot.
- Uses as little as 30 gallons of water and 20 minutes per regeneration cycle.

Stainless Steel Tank

- Limited Lifetime Warranty

Contact us today to find out how you, your family and your pets can start enjoying the benefits of purified water.
