

Ice Combo Water Purification System from Watermark

Features include:

- Dual system reverse osmosis water purifier with integrated ice maker
- The “Freezing Point Method” creates pure, clean ice. The secret to pure ice is freezing it at exactly 0 degrees.
- Crystal clear ice cubes are made through an injection spraying method, allowing them to hold their shape a long time
- Controlled by various sensors for air temperature, icing temperature and condensing temperature
- You can control the amount of ice cubes according to how long you press the button
- Free installation
- All filter and service replacements included

Contact us today to find out how you and your employees can start enjoying the benefits of purified water... *and ice.*
