

## Pure Hype

Like most businesses, you care about your employees' health, but you also watch your bottom line.

If you are using a bottle water cooler in your office, you could be paying more for each gallon of water than you are paying for a gallon of gas.

According to the World Wildlife Fund, up to 40 percent of bottled water comes from a city water system and its selling for up to 1,000 times the cost of tap water.

What's more, the bottles clutter your office and your employees are risking back injuries lifting the 40-pound bottles every time it needs to be changed – back injuries that could lead to workmen's compensation claims

## Why are Watermark purification systems better than bottle water coolers?

Read for yourself.

Watermark	Bottles

## Pure Alternative

Our bottle-less water purification systems provide a nearly limitless supply of crisp, clean drinking water without the hassles associated with bottle water coolers.

Through ultraviolet sanitization and micro filtration technology, these high-tech purification systems produce water that far exceeds federal bottled water standards, removing over 140 potentially harmful contaminants from your water.

### Additional benefits include:

- Never having to clutter your office with full and empty water bottles;
- Never having employees risk back injury lifting a 42-pound bottle;
- Purified water dispensed ice cold or steaming hot; and
- Healthier, happier and appreciative employees.
