WATERMARK USA OPENS HEADQUARTERS IN CHESTERBROOK

Offers Water Purification Systems for Home and Office

CHESTERBROOK, Pa. — Watermark USA, a unique business specializing in water purification systems for homes and offices, recently relocated its corporate headquarters to Chesterbrook, Pa. from King of Prussia, Pa. The new offices will enable the company to proceed with its plans to expand nationally.

Watermark provides high-tech water purification systems that enable users to live healthier lives. These systems dispense higher-quality water at a lower cost when compared with traditional bottled water. The home and office systems use multi-stage filters and ultraviolet sanitization to ensure bacteria and dangerous chemicals are eliminated from the water. Watermark's eSpa home systems remove harmful chlorine from water used for drinking, cooking and bathing.

"We offer alternatives to traditional sources of water," said Eric Guenther, President. "Alternatives, to bottled water, alternatives to tap water and alternatives to bottled water coolers. The bottled water industry is the fastest growing segment of the beverage industry, but not many people realize that most bottled water is nothing more than filtered tap water. We are offering an opportunity to eliminate the middle man. Home owners and businesses can use our products to filter their own water, at a fraction of the cost of bottled water."

Watermark has been in business for over a year and has grown rapidly in a short amount of time. Hundreds of customers have chosen Watermark's inexpensive, high-tech systems to provide their families and employees with healthy, purified water. In addition to bottle-less water purification systems, Watermark also offers shower heads, bath crystals and sports bottles, all aimed at eliminating chlorine from the water we use to drink, cook or bathe.

"Several studies have shown that chlorine can be harmful to our health," said Guenther. "It has been linked to cancer, heart disease and a host of other illnesses. By eliminating chlorine, you can provide a healthier lifestyle for you, your family and your pets."
